PROGUARD WE'VE GOT IT COVERED

LPS1207 FLAME RETARDANT DOOR SLEEVES

Product Code	Pricing Unit	Colour	Dimensions	Pack Quantity	Pallet Quantity
PEDSF2	ROLL 50	White	2200mm X 1000mm	1	20

Product Description:

These LPS 1207 certified, flame retardant, semi-translucent plastic sleeves fit any standard size doors and provide cost effective protection from dust, dirt, paint and mortar splashes during building and refurbishment work. Each sleeve is sealed on two sides to slip over the door quickly and easily, allowing it to remain fully operational once the sleeve is fitted. The cover also provides a surface for fixing any additional protection materials without causing damage to the doors or leaving any adhesive residue.

Benefits:

- Fits any standard size door
- Cost effective protection from dust, dirt and scratches
- 100% waterproof
- Simple to fit and remove
- Doors remain fully operational
- Flame retardant to LPS1207. Certificate number: 1868a/01
- Can be custom printed with your logo
- Comes as Roll of 50

Limitations:

- Provides a light duty protection from scratches and paint/mortar splashes – not suitable for heavy impact protection. We recommend *Proguard Flame Retardant Protection Board* is used over the door sleeves when impact protection is required.

Application:

Simply slip the door sleeve over the top of the door so that the sealed ends are at the top and outer facing edge. **Pull taught and use** *Proguard Ultra Low Tack Tape* to fix the loose edges if necessary. If the door sleeve is too large for the door simply trim to size with a knife or scissors.

Performance Data:

Thickness	45mu
FR Certification	LPS 1207
Slip Characteristics (when dry)	High Slip Level
