PROGUARD WE'VE GOT IT COVERED

FLAME RETARDANT (FR ADDITIVE) DOOR SLEEVES

Product Code	Pricing Unit	Colour	Dimensions	Pack Quantity	Pallet Quantity
PEDS2	PACK 10	White	2200mm X 1000mm	10	100

Product Description:

Proguard door protection sleeves are manufactured from white, semi-translucent plastic sheeting to fit any standard size doors.

The door covers provide cost-effective protection from dust, dirt, paint and mortar splashes during building and refurbishment work. Each sleeve is secured on three sides to quickly and easily slip over the door.

Doors can be hung and remain fully operational once the door sleeve is installed. The cover also provides a surface for fixing any additional protection materials without causing damage to the doors or leaving and adhesive residue.

Proguard door sleeves are fire-retardant but if a fully certified option is required we recommend our *Proguard LPS1207 Flame Retardant Door Sleeves.*

Benefits:

- Fits any standard size door.
- Cost-effective protection from dust, dirt and scratches.
- 100% waterproof.
- Simple to fit and remove.
- Doors remain fully operational.
- Fire-retardant.
- Can be custom printed with your logo.

Limitations:

- Fire retardant, but not certified to LPS1207.
- Provides a light duty protection from scratches and paint/mortar splashes – not suitable for heavy impact protection. We recommend *Proguard FR Protection Board* is used over the door sleeves when impact protection is required.

Application:

Simply slip the door sleeve over the top of the door so that the sealed ends are at the top and outer facing edge. Pull taught and use *Proguard Ultra Low Tack Tape* to fix the loose edges if necessary. If the door sleeve is too large for the door simply trim to size with a knife or scissors.

Performance Data:

Thickness	60mu
Film Grade	Virgin LDPE
Additive	Flame retardant
Slip Characteristics (when dry)	High Slip Level
