

## PROGUARD INTERLOCKING FLOOR MAT

Product Code	Pricing Unit	Colour	Dimensions	Thickness	Pack Quantity	Pallet Quantity
PGM10	Each	Black	500mm x 500mm	12mm	1	500

### Product Description:

Proguard interlocking floor mats are a high-quality matting tile system manufactured from hard-wearing, impact resistant recycled PVC. They are ideal for protecting flooring from heavy foot traffic and impacts. The interlocking design eliminates the need for tape or connectors, minimising install time and reducing trip hazards.

### Benefits:

- 100% recycled material.
- Non-slip surface.
- Interlocking edges
- Lightweight
- Prevents property damage.
- Seamless join minimises trip hazards.

### Limitations:

- Not suitable for larger loads on soft ground.

### Application:

Check and sweep the route that you will be laying the mats over. Place the mats over the area, joining together using the interlocking lugs on the side of the mats. They can be clicked into place by either treading on the joint or gently tapping with a rubber mallet. If laying on finished internal floors we recommend underlaying the mats with a suitable fleece product.

### Performance Data:

Dimensions	500mm x 500mm
Thickness	12mm
Basic Component	recycled PVC.
Weight (Kg)	1.8
